

# ATHENA 3

**TRIMALCO**  
LARGE FORMAT CUTTERS  
www.trimalco.com MADE IN THE UK

## INTEGRATED CUTTING SYSTEM

The new Athena 3 is our top of the range integrated cutting system and features dual cutting tracks, one for the blade and another for the cutting wheel. It can be attached to an existing worktable or alternatively it can be attached to one of our purpose built Atlas Tables to create the perfect cutting station.

The Athena 3 is available in 5 sizes • 1.6m (64") • 2.1 (84") • 2.6m (104") • 3.1m (124") • 3.6m (144").

### FEATURES INCLUDE

- The cutter rail extrusion offers accuracy of 0.4mm (.016") over the length of the cutter.
- A replaceable integrated cutting wheel track allows textile and other delicate materials to be cut cleanly and accurately when a knife blade is not suitable.
- Adjustable mounting brackets allow the base extrusion to be easily adjusted for both level and straightness; both of which are necessary for accurate cutting.
- When not in use, the cutter bar can be rotated to a safe positing under the cutting table or workbench when not required, leaving an unobstructed work surface for performing other procedures.
- Three full length silicone grip strips, two on the cutter and one on the base, aid clamping and help protect the surface of the material being cut.
- A torsion bar allows the cutter to be controlled from a single lever at either end.
- A full length measuring scale included as standard.
- A 5 year guarantee on all parts except blades and cutting wheels and a 20 year guarantee on the cutting head bearings.

"Our most versatile cutter yet"

### 3 Standard blades:

- Utility Blade • Textile Wheel
- Acrylic Scoring Blade

### CUTTING CAPABILITIES

- Acrylic (Score and snap) • Cardboard • Foamboard • Banners • Fabric and textiles • Corrugated plastic
- Polystyrene • Foamboard • Magnetic sheet • Self adhesive vinyl • Inkjet Media • Film • Paper
- PVC Foamboard

*Plus many more... We will produce a test cut on request for any of these as well as materials not mentioned.*
