

MEET AND GREET COUNTER - ET3-1032

- 1** Open up the frame keeping the hubs with steel pins facing up.

- 2** Insert the 8 Channel Bar A vertically, to both the front and back of the frame. Start by slotting point end inside upper hub first.

- 3** Slot the flat end of the channel bars into the lower hub from the side. Insert the Channel Bar B horizontally to front and back.

- 4** Insert the 4 Channel Bar C to a 4 corner as a curved. Once all channel bars are attached, insert the internal wooden shelves, placing them on top of the hubs.

- 5** Attach your graphic panel. Starting from one end, keep it level with the horizontal channel bars.

- 6** Place the counter top, ensuring the holes on the underside match the steel pins on the hubs.

- 7** Insert and secure the shelves into the center of the aluminium frame.
